

How to Become a Narcan Distribution Site

For Community Organizations in California

The [Naloxone Distribution Project \(NDP\)](#), from the California Department of Public Health, aims to reduce opioid overdose deaths through the provision of **free** naloxone (Narcan). Since it began in October 2018, the NDP has distributed more than 2,100,000 kits of naloxone, which have been used to reverse more than 135,000 overdoses.

1. Complete and save the [NDP Application](https://tinyurl.com/NDPapplication) (tinyurl.com/NDPapplication)
2. Get a standing order for Naloxone by completing [this application](#) (tinyurl.com/NDPstandingorder). When you click submit, it will generate a document that you can save as a PDF or word document. Save this document.
3. Create a distribution plan. This is a document detailing how you plan to distribute narcan, and what communities you will be serving. It should also include a plan for how you will track the usage of narcan.
4. Submit materials by email to naloxone@dhcs.ca.gov. You will need to submit
 - The NDP Application
 - A copy of the standing order document from step two.
 - Your distribution plan
5. In subsequent applications, you will need to provide all of these documents, in addition to providing the number of overdose reversals reported with naloxone received through NDP.

The FAQ for this process can be found [here](#). You can also email questions to naloxone@dhcs.ca.gov.
